Start

Type of Issuance On Line?

Yes → To send

No → TIMER

To send:

Authorized?
- **No** → FormaEmissão= OFFLINE GravarXML (Write unauthorized XML for future reference - 'XML PENDENTE')
- **Yes** → Print (Online broadcast)

(From "No" branch of Type of Issuance) **No** → Assinar / GravarXML (Generates XML with tag "tpEmis=9". Sign and Save XML OFF-LINE for later shipping) IMPORTANT - It must not be using the same number NFCe from "XML PENDING") (Numbering is increased)

Assinar / GravarXML → Print (Issuance of XML generated in Contingency)

TIMER → StatusServico (You can check Service Status or simply come back ONLINE after a while)

StatusServico → Operant?
- **Yes** → (to Consulta / FormaEmissao branch)

FormaEmissao= NORMAL Returns to online broadcasting

Consulta (See the Key left Pending) currently entered in OFFLINE

Consulta → This at SEFAZ?
- **Yes** → EnviarEvento (Send Event Cancellation by Replacement, referencing the Key which was issued in Contingency in time of the problem)
- **No** → Inutiliza (It makes the numbering useless, because the NFCe in Contingency, increasing the numbering)

Enviar (Routine to send all XMLs printed on Contingency)

Operant?
- **Yes** → End
- **No** → Right

Print (Online broadcast) → End
